

Wolf Boy

I was watching this movie. It was about a little boy who was a werewolf. I don't know who he was, but I shall call him Charlie for now. How Charlie became a werewolf is one of the most common ways- getting scratched. He held onto his hand as if it hurt a lot, he was not crying though, just concerned. It's almost like he wanted to be one, but it wasn't mentioned.

There was this one scene where an orphanage burns down. A man tries to lure a girl in order to shoot her. Supposedly, the man told the girl that he was her father. "Daddy! I been waiting for you my whole life!" as she opened up her arms to give the stranger a hug. "Susie, NO!" Charlie screamed in agony. The guy just coldly stared at the boy and said, "How about you leave us alone?" "Yeah." Susie agreed. "How about you leave us alone?" This triggered Charlie's transformation as a shaggy tail rips through his jeans.

There was a transition and he was in his wolf form. He looked small, for a wolf that is. He looked more like a coyote in the face, but he was grey all over. He growled viciously, getting ready to attack the man.

Meanwhile, I was analyzing the movie as if I saw a preview of it. I was writing down the reason why Charlie went "wolf". "Was it because he wanted to protect Susie?" I asked. "Yes." A random lady said, assuming she's the director of the movie. "What'd you think?" I don't remember what I said, but I assumed I liked the idea. Out of the blue, I told the lady I had a fursona and that I was a coyote. "You're a coyote?" She repeated. The co-workers looked at me. They didn't know what I was talking about (which made sense). Just then, I turned into my coyote self. They were shocked to see my hairy situation. I wasn't kidding. I was born that way.

The next day, I was in human form. I saw faux fur all over the table. "What's the meaning of all this?" I queried. "Oh, we decided to cancel the movie. We're making a fursuit company!" At this point, I was disappointed. I wanted to see the film when it came out in theaters. But seeing that they abandoned it for a fursuit company left me heartbroken. With a budget that good, it could have won some rewards.
