

Curious a Mawile as she was, Amelia always wondered what it was like to have a dick. She saw her friends, who regularly fapped a boner as casually as one would clean off a stain on their fur. Before she was who she is today, they all had somewhat of a lack of shame around each other when it came to sexual needs. They never stepped up their friendship, keeping things down to masturbation so as not to offend reality, but even if someone was in the room they would just jerk off a boner if it rose up. What was it like, spewing cum from a cock head like a fountain, or sometimes a volcano when the boys were pent up.

A fountain. A volcano. What would it be like to literally cum like that? What if Amelia could not only become male, but increase her output exponentially? Hyper, it was called! Could she become a hyper male?

No, malehood wasn't THAT great. Amelia liked being female. Sure it had its downsides, like the occasional period, but leaking blood out of her sex organs made her metal as hell (no pun intended). That, and she appreciated the fine pleasures of having a vagina, all the sensitive insides she could rub and finding those special spots where she would just be wracked with pleasure. Therefore, she decided that she would become a male but retain her vagina. She would become a hermaphrodite.

Lucky for Amelia, she was a Mawile. Fairies were known for their magical abilities, as opposed to the strange mental abilities of the psychics. Amelia had been experimenting with magic quite a bit, manipulating all sorts of strange powers using the ones she had. She made many discoveries, most of them minor but a few major - She could become transparent for a short time, but only in the right circumstances and in lab conditions. As soon as she started experimenting with sexual magics, she found a vast array of things she could already do! Innate abilities that she could unlock, all sorts of things that she knew all along! Apparently her species wasn't known to be devious just because of their giant mouths.

Eager but cautious, Amelia started working with her magics to get that pillar of flesh she desired. She sat down and performed the spells on herself, causing her body to change. She felt her heart beat fast in her chest, and her sexual libido increase. Something in her crotch throbbed... it started growing and extending... a penis was forming! Right in front of her vagina a set of balls were also forming. Her body had all sorts of chills and hot flashes. It was strange... but when it was over she felt fine. There she was, sitting there with a pair of balls and an erect penis. She gave it a tap and felt pleasure. She had succeeded.

Amelia eagerly started jerking herself off as her friends had done. It seemed completely natural, playing with this cock. Within a minute she was blowing her first orgasm of semen onto the floor. It was so good! This was pleasure, but... like a new kind! She wanted more! She worked her magic to revitalize herself, give herself a new load to blow. That's when she discovered that her second desire was easier to make reality than she thought - she had overapplied the magic and caused her balls to swell. It was a bit painful, but they had grown. All she needed was to remove the pain and leave only pleasure.

After fapping out that load, she went back to work experimenting. She occasionally paused to jerk out another load, her excited cock apparently too easily pleased, or maybe too greedy for her touch. Her desk was a musky mess by the time she worked out what she believed to be a good spell. She used it on herself and, like magic, her balls swelled rapidly. They audibly groaned as they filled, sagging onto the ground and swelling like balloons. They ceased when they were as big as Amelia, leaving her with a tiny cock and a lot of cum to blow.

After an hour of constant orgasm, Amelia was exhausted. After a quick nap, she resumed her work. She needed to add cock growth to her spell. An hour of work succeeded in giving her a cock that swelled in size... painfully... she had to halt the spell part-way through for her own sake. Her cock nearly stole all the blood from her body! Not good! Knowing the spells would work best when combined, she came up with an idea. If she made her cock erect with her semen rather than her blood, she could easily survive having a cock the size of her body and much bigger.

Bigger... how big could she get? She started working some calculations with this spell and found an oddity - there were so many zeros at the end of this number, and that didn't include the other numbers in between. They just kept going on and on... almost infinitely. No, she couldn't find where the numbers ended. Here she sat with a number forty digits long that represented how big her cock could grow. calculated in miles, Amelia decided to calculate in astronomical units... no, in light years. Again she found the same thing, an infinitely large number. Could it be she had created a spell that made her growth... limitless?

She had a thought. Having to use a spell whenever she wanted to grow was annoying. She had been working with exponential and logarithmic numbers long enough. She worked some more magic onto herself which affected her cock in a very unusual way, one she very much loved the concept of. She would, from that moment forth, produce cum very rapidly. It would take merely an hour to fill her ballsack from when it was bone dry, but at that point her productivity would double and continue to produce cum. Her balls would swell, and cum would leach into her cock and make it erect and swell proportionally to her balls. By the time they were swollen double their size their growth would triple... then later they would quadruple their output, pentuple, and so on and so forth.

A single night of sleep proved to Amelia how productive she had made herself, and how much she loved this new body of hers. Her stiffy was twice as tall as her, reaching halfway to the ceiling, and her balls were swollen like giant beachballs and sagging off the bed. Pleased, she sat up and started fapping. Then, she discovered another affect of her magic - something unforeseen, but very much loved. By giving into her arousal and stimulating herself, she seemed to unfathomably increase the speed of her productivity. Her cock pulsed hugely as more cum was leached into it, her balls groaned and swelled even more. Overjoyed, Amelia rubbed her entire cock all over and came like a fountain, coating her room in musky cum.

After that, she focused on a spell to keep her house clean from all her future antics.
