

Caliph Industries

Mission Statement

Our mission is to devise and provide to the consumer gratification across a wide spectrum of interactivity, utility and pleasure.

Company Structure

Corporate Headquarters

Our flagship building, containing our administrative and research and development facilities. Our small corporate staff makes use of advances in automation and security to oversee a much larger company than others are capable of. Our Corporate Headquarters prides itself on being virtually entirely self-sufficient, growing its own food and generating its own power from renewable resources.

Raw Material Refinement Facility

Our large production complex is responsible for the collection and refinement of raw resources into more practical material that are then shipped to our various manufacturers and vendors. By far this location is most crucial to our operations and features many of our more innovative practices.

Numerous Corporations and Small Business Retailers

We are partners with or have majority stakes in over 500 different retailers across the globe who sell or distribute technological, chemical and biological transformative and supplementary material from our production facilities. You likely have some of our products in your house or apartment.

Gate on the Falls

An experimental testing ground that makes use of a lottery system to ensure a diverse and morally equitable testing corps for our various products. All winners and employees at our Gate on the Falls location are there by their own choosing and enjoy themselves immensely. For more information contact our Lottery registration at our Corporate Headquarters.

Very Respectfully,
The Producer
Chief Executive/Majority Shareholder of Caliph Industries
