

One day at about 1 pm there was news that some sort of monster had appeared in the downtown area.

The Defenders of Crystal then show up, and discover that their necklaces can allow their appearances to change and gain their weapons.

It also was noticed that Lenonardo had joined the fighting.

Leonardo- His Jumpsuit does not have the sleeves or pants part to it but has black knee pads on the knees, and also has orange fingerless gloves as well. He uses the strength element and uses his gauntlets to fight with, and has a fist shaped gemstone on his chest.

He had said during the fighting that he was nearby and awakened to his powers and began to fight out of reflex and did join the team as well.

It wasn't until Cole delivered the final blow to end the fight where the team had won.

It was then noticed that their clothes had retreated back into their necklaces with Lenonardo having a fist shaped necklace now.
