

Off screen Theodore had started to navigate using his powers more, and Lucas had introduced Nicholas to the time realm, in which he gained his powers and weapon.

In which the team of five... proceeded to mop the floor with the desert labyrinth.

It was calculated that the Desert labyrinth is based on the history of ancient Egypt roughly and that it was shaped like a pyramid.

It also was calculated that there should be a guardian of this dungeon that should have some sort of key or clue for the next area.

The boss guardian was a sphinx with the second time gemstone in its chest and the team did have a hard time with it but.

Lucas had delivered the final blow to it with his sword and caused the form to be destroyed like a gem from the gem homeworld and had picked up the time gemstone, the 2nd one to be exact that had fallen from it's chest.
