

After the Mini-break the team had traversed into the Magic Citadel yet again, and made it to the 4th area.

The 4th area still being about 25 floors deep was this Temple of an old egyptian styled Pyramid which was a temple of an old pharaoh.

Throughout exploring the upper levels of it Wyatt could sense that someone else was in the citadel but they were in the upper blocks with a very powerful magic signature.

Even though the team sort of wanted to know who the mystery vigilante was they could not backtrack that far now because they would lose time.

However Skyler had snuck off to investigate who the vigilante was. They were gone at the last reported area they were but he did find a strand of black hair that was sort of neatly braided.

Once the exploration of the 4th block was done Skyler had rejoined up with the group, Preston was really the only one who noticed but Wyatt did not.
