

The team begins to piece things together in order for whoever could be the mastermind behind the disappearances and kidnappings of people around town.

Axel this time had laid out a board with everything they have collected so far from the past incidents and were able to figure this out.

Whoever was doing this, clearly has influence over real life magic or in this case a dimension where history becomes real and takes the form of monsters in the other world.

It could not have been any of the people apart from the monster fighters as their alibi was airtight for all of the disappearances and kidnappings.

Dominique could be a suspect or maybe the mastermind behind all this, but there needs to be concrete proof about it.

Lastly the pattern of kidnappings at museums and the school could lead that the museums are connected along with the school itself.

Axel had pointed out that Jade might be another monster fighter as whomever entered the other side got powers but clearly there would be more than the likely 7 who have powers that would have shown up by now.

"Everyone, our next goal would be to save Jade and Track down Dominique if he is the source of all this" Adam had said rather confidently.
