

The Team were jetting off to the next kingdom where they realized that the Celestite kingdom and the Chrysocola Kingdoms were close to each other.

Juan was doing some research that there may be a clue in either one in these bases.

So It was joked that they could do a "speed run" by kicking the butts of the bad guys off the remaining bases.

So the two kingdoms were freed and at the Chrysocola base it had the coordinates of the hidden airship floating near the Chrysoprase kingdom.

It was then learned that the leader of the organization was a crafty person from off planet.

Their goal was to turn Mezzanine into a factory plant and grow rich while also industrializing the planet.

It was also learned their hypnotic magic they used was stolen from the Gaian Homeworld, and partly manufactured on the Gloria homeworld as well.
