

The wolves are seen relaxing in their living room until there was a huge thud from upstairs, they all look at each other before going out to see a searching robot by their front door.

"WAIT WHAT THE FU-" Zephyr said before Artemis used his magic howl attack to stun the robot.

"Wolves don't just stand there ! break it as fast as possible before it sends a signal out!" Artemis said this as he leapt out and did another magic howl attack.

The other wolves summoned their weapons to attack
"Everyone with me!" Artemis shouted as the wolves did an all out attack on the robot before destroying it.

"G-guys... i am sensing a whole lot of these robots a-all over town and one is by t-the school" said Akira stammering a bit.

"How many are there?" Said Bodhi, scared, "There are 4 of them, this was the 5th one..." Akira a bit shaky.

"In that case... we should fuse together so we can tackle them more faster" said Colton calmly
"Artemis your powers aren't that strong it will be like the last time we fused where you had to sit on our shoulders". Colton put his hand on Artemis as he nodded in agreement.

"You guys heard the man! It's fusing time!" Said Victor.

One of those searching robots can be seen digging around in the dirt of a playground as there are terrified school kids seen crying with a few teachers at the other side.

Soon a 5 story tall wolf fusion with 8 arms that's a mashup of the wolves besides Artemis with he on the fusion's shoulders shows up and one of his arms grabs the robot and crushes it.

"You all are safe now we can take care of this!" Artemis said to the scared townspeople as the fusion takes off running to find more of those robots.

The 5 story tall wolf fusion freezes in its tracks and starts glowing white as the fusion is falling apart as Artemis can be seen getting panicked. "W-wait g-guys keep it t-together!"

In the distance the fusion falls apart but Marbel had formed and used his powers to levitate the wolves back to the ground. "That was a terrible idea and I blame Magma and Zephyr for that" marble said as the two wolves mentioned got pouty as the last remaining robots appeared behind them as they were in the town square.

Artemis did his magic howl attack as the other wolves used their own weapons and powers to take the robots down but it was in a very sloppy and uncoordinated way that worked because it was so sloppy.

Once a crowd had gathered of the fight the wolves and then ran away once they spotted an opening, as the wolves hid behind some trees once they got far away enough Bodhi not showing much emotion on his face or failing from panting so hard vs Colton who was panting hard with a look of exhaustion on his face.

Marble had unfused as kage was tired as well as Akira was fine "are you guys okay? That was uh.... An interesting way of taking down those homeworld searching robots" Akira said this but got intimidated by the other's death glares.

So Victor the next day helped them train more as Artemis was slowly getting better control of his powers during their many training sessions.
