

In the background Athena and her family are still organizing the plans of a wedding and their latest operation to harness the powers of the eight magic gaian crystals for more power.

Gaia is a magical planet where the infamous magic comet crashed onto the planet thousands of years ago in their version of the caveman period. An early ancestor to the Eardwulf family was exposed to the magic and the remaining wolves that mutated them to have special magic and caused the wolf population to explode so that current day 50% of the planet is made of wolves.

There are eight areas on the planet that hold the special magic gaia crystals that help provide stability to the planet as it's grown to be dependent on the exposure to magic.

Ice, Fire, Darkness, Light, Strength, Steel, Electricity and Water and there are temples on top of the magic power spots to hold these crystals of magic across gaia in their 8 out of the 9 kingdoms there.

The silver family is moving forward with a plan to harness the powers from these magic powersports to become even more wealthy, while also creating special gauntlets to function like a beast trigger for anyone to have control over magic.

What The Owner (Mr Silver) and the Ceo (Ms Sliver) did not know is that Athena had developed a plan for these "magic gauntlets" and wanted one for herself so they gave her that wish... or rather the plans for it into motion.
