

One 5 Hour Space trip later the wolves arrived back on earth, back to their home temple and back in cypress woods.

Amber and her siblings and the rest of her friends welcome back the wolves.

"Hey who are the two newer guys?" Amber asked, looking at Solaris and Dakota.

"Oh i don't think we properly met, I'm Solaris Artemis's twin older brother"

"Oh i remember seeing you during that final battle..."

Amber looks between Artemis and Solaris looking a bit confused "You two are twins but don't look related besides your eyes... and i think your hand markings".

Artemis and Solaris looked at each other and chuckled "We both share a middle name Onyx" The two said in unison.

Amber looks at Dakota "and you?"

"My Name is Dakota Eardwulf, but please call me by my last name Eardwulf pleasure to make your acquaintance Miss lane"

"Oh wow what a gentle man, but you can call me by my First name Amber i do have two sisters after all" Amber said blushing a bit out of being flustered.

"I will remember that, and I already call Artemis and Solaris by their real names vs their last names because of you know them being brothers."

So after the wolves reconnected with their earth counterparts Amber had noticed something.

"Hey... where is Kage and Akira?" Marble perked up, and unfused for a moment showing Kage and Akira before refusing.

"Ohh I see, they are staying fused how nice" Amber smiled "We are hoping that staying like this will help us grow closer as boyfriends and it's more fun doing that when someone asks where the two love wolves are."

Later on that night (it was a Friday) Amber and the rest of the wolves had a camp out by the temple but a shadowy figure could be seen getting out of Artemis's ship and walking inside the temple or rather the cabin on top of it and quietly shutting the door.

Victor's ear twitched a bit as he perked up eating his food "What is it big guy?" Zephyr asked "I heard the door to the temple shut... are you messing with the wind or something?" Victor looked at Zephyr confused as he just shrugged.
