

The Opal sisters, Justin's older sisters, are seen finishing up their final plan.

Their plan is to send out special leveling robots to help develop the planet better to make profits.

The robots were programmed to destroy things, and also destroy the rebels of gaia and their little brother in the process.

The six sisters are sitting back waiting for the plan to finally come true.

"Justin was found on earth right?" The youngest sister said.

"Yes our game plan is to bait out the wolves to finally eliminate them for the sake of our parents and our corporate empire." The eldest sister said with an evil grin.
