

It was a beautiful day in the woods and Laterios was fast asleep on a pile of hay, the sun high in the sky. He mumbles and scratches his belly as he dreams about having a nice belly rub by two sexy latias's, he murring and smiled in his sleep, enjoying the calm warm day. Mean while by a near by pond a pink slime blob was soaking up the water and using it to grow larger and larger till it reached its max size of 50'000 gallons, it then oozed on to find another pond when it saw the sleeping lati.

Gumball: "ooh, a latios, he look comfy, me make him home." The alien blob said and oozed over to him and formed a goo tentacle with a simple face, smiling as she looked at him, when laterios yawned she made her move, pushing into his mouth and down his throat, he snapping wide awake as he struggled to get free, but she held him down. He was forced to swallow the large pink blob, gulping loudly with each mouth full, he felt his stomach start swelling slowly, inching outward with every gulp.

He struggles and tries to stop her from invading his stomach but nothing worked, his belly already the size of a beach ball and still growing, his throat bulges with every gulp and his belly continues to swell, showing bulges as gumball probes his inner walls, making him blush deeply at this feeling, his belly now reaching 5 feet big and continuing to grow the more gumball flowed inside. Gumball: "Mmmmmmm you nice and warm, you good home, me stay in you forever and ever and we be best friends." Gumballs voice was like that of a 10 year old girl, and her vocabulary was basic at best.

Laterios held his growing belly as his paws sank into his growing gut, it reaching 9 feet and growing, gumball having a fun time filling him out and slowly she started to go into other parts of his body, they swelling slowly as the bulk of her form staying in his stomach, his arms, fins wings, neck and cheeks grew a bit more pudgy as she was only partially inside him, finding it comfy.

Hours later his belly reached 30 feet big and he had doubled in over all size thanks to the layer of goo in his body, he gulped down gumball as she was half way inside him, his belly squirming and bulging as she keeps moving around inside, he eventually gives up and just lets the slime inside, even helping gulp down more goo.

By the time he hits 125 feet big gumball was almost fully inside her new home, Laterios being huge and so heavy he can't fly any more, another 200 gallons was still outside him as he watched his mammon gut grew bigger and bigger, he actually enjoying it and his member, having also swelled thanks to the goo and turning bright pink for all to see, finally the last bits of gumball flowed into his mouth and joined the rest in his stomach, he belching loudly as he gets used to having this slime in his belly. Gumball giggles and squirms more. Laterios: "well...this is new, I'm not going any where for a wile."

He yawns and drifted back to sleep, only to wake up when he feels something licking his member. He couldn't see that a female typosion found him and decided to have some fun with him, she being in heat and could really go for some sex, she growled lustfully as Laterios squirmed. Laterios: "Hey! Who is that?" He asks and then felt something slide onto his member and he blushed madly, it was clearly female by the fell of it, a very tight one as the typosion bounced on that fat dick of his and he blushed madly about this, having his male organ used without his consent but he can't fight that it felt great, the typosion girl moaned loudly as she

rides him, Laterios blushed still as he felt the slime inside him get very much active from the feeling of the girl on his dick and has an idea, Laterios came and filled the typllosion with the pink goo, making her belly fill out to as bi8g as she was, she purrs and when she gets off, but a strung of pink goo still bridged between her hole and his dick, then it splits into tentacles and grabs her then pulls her to his dick then down into it, she struggling to get free when she felt her womb move as the goo inside her went active, Laterios moaned loudly from this new feeling and felt the typllosion get pulled into his internal nuts and gets played with by his new tenant. Looks like this will be fun times for every one.
