

Sugarwaifu MEGA.nz folder

You can watch and download ALL my free videos now! With how unfriendly Youtube and Pornhub are towards content like mine, I wanted to have a place where you guys can reliably find all my stuff. I have multiple backups of this MEGA (both physically and digitally) backed up in case of a worst case scenario.

You can use the search bar to find the video you're looking for, if you remember its title. Unfortunately I can't add tags, as MEGA does not have that option.

UPDATE 04/07/22: *I've been notified that a MEGA subscription is required to download all of the content in this folder, because it's such a huge file and MEGA only lets you download so much for free. I don't want you guys to have to pay to do that, so I've made a Google Drive too.*

*If **Google Drive** suits you better than MEGA, here's a link! Contents are the same:*
https://drive.google.com/drive/folders/13Y8N4ggMNAAtC6SCI2-aScaHH_XZ7xCx

I've made 3 main folders: **Sugarwaifu**, **Sugarchu**, and **Sugardrop**. *You must click on them to view their contents inside. Sorry about the confusion.*

- **Sugarwaifu:** NSFW/lewd asmr roleplays.
 - **Sugarchu:** SFW asmr roleplays. Some vids are formatted like visual novels and have a VN feel to them.
 - **Sugardrop:** Sounds to fall asleep to: triggers, mouth sounds, ear eating, etc - true asmr. No plots.
-

Within each of the main folders, you can find:

- **All of my videos**
- 2 more organizational folders:
 - **Organized by one-shot or series (both mp3 & mp4s included)**
 - **All mp3s**

All of my videos:

- Video files (.mp4) can be seen immediately after clicking one of the 3 main folders.
- Want to sort these videos by order of release date?: If you want to see video uploads in a format that looks just like my old Youtube channel (aka sorted in chronological order by upload date), you can right-click and then select "**last modified**" (NOT "date added").

Folder 1: Organized by one-shot or series (both mp3 & mp4s included)

- This folder organizes my roleplays by classifying them as either a one-shot or part of a series. If it's a one-shot, it goes in the **One-shots** folder. If it's part of a series, it goes into the **Series** folder.

- Within these folders, I've put both .mp3 and .mp4 files here, meaning each roleplay will have both audio and video files (and, sometimes, alternate versions of the audios like different pitch, no music, etc.) I know not everyone wants to download a huge video file, especially if the video component is nothing but a still image. So that's why I've included .mp3 files too.
- The **Series** folder has many other folders inside it which organize my roleplays by series such as *School Slut*, *Yandere Love Potion*, *Tsundere Classmate*, *Stepsister Situation*, and more. The remaining roleplays are one-shots, meaning they aren't part of a series – they're a standalone thing, so you can find them in the **One-shots** folder.
- One-shot titles will be moved to the **Series** folder if I decide to add a continuation of the story at a later date. For example, if I decide to add another part to *Stepmommy's Smooches*, it will be moved from the **One-shots** folder to the **Series** folder. Why does this matter? I just wanted to let you guys know in advance about why some things may be rearranged every now and then.

Folder 2: All mp3s

- This folder only has audios in it, no videos. Only mp3 files here.
- You can sort these in order of release date by right clicking and selecting then select "**last modified**" (NOT "date added").

PS: On the MEGA.nz video player and audio player, sometimes when scrubbing through, the audio might get distorted for a second, but it returns to normal if you pause it and then resume playing the file. I'm just putting that out there to let you guys know because it spooked me the first time it happened.

This can happen because the media player can be a little heavy for your web browser to handle at times depending on your system, so it can distort the audio by making it a bit slower or lower pitched for a sec. This happened to me very rarely though.

To avoid this altogether, you can download the files instead and play them from your computer's media player like Windows Media Player. But your system should be able to handle MEGA's media players if you don't have a toaster for a computer like me ;_;

OR, you can just use Google Drive's media player. It's much better. Here's a link to the Google Drive: https://drive.google.com/drive/folders/13Y8N4ggMNAAtC6SCI2-_aScaHH_XZ7xCx

I am open to suggestions about how this MEGA could be organized better for you guys. If you notice anything out of place or missing, or have some organization suggestions, please email me at waifusugar@gmail.com

Happy listening!
