Information on the Art Pack

Tiers

- [illegible]

Every single penny (*minus the automatic E-Junkie → PayPal fee*) will be **evenly** divided amongst all the artists. There are no managerial fees, PR fees, cuts... so on. Payments will be handled through E-Junkie and then sent to the PayPal of Fishy-Pony. The money will be split on the **14th of August** as this is when we will draw a close to the “**top donor**” feature. The pack

will still be supported and it'll pay for its own hosting on E-Junkie for as long as there is interest. A monthly check-in will be made to the Skype group until either:

- A consensus is reached on when we would like to split the funds
- Interest has dwindled and we might as well stop renewing the host payment

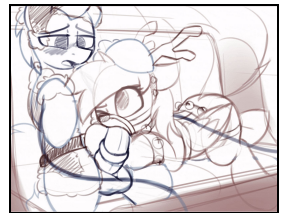

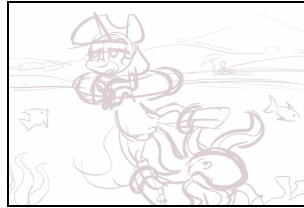

What's Expected

We need three lined (*or lineless!*), colored, shaded, detailed, and backgrounded pictures by July 20th. Any additional **edits** are MUCH appreciated!

What'd be Super Appreciated...

We would like at least one 'finished' SAI file from every artist exported as a PSD file (*as PSD files have smaller file sizes*).

If if you would be so kind as to save some work-in-progress pictures and send them over to Fishy-Pony via a .zip file or imgur album along with the finished .PNG file(s). This is totally not mandatory, it would just a nice addition to have at least one per artist!

Why do This Time Lapse Stuff?

Some art packs include sped up .MP4 videos of an artist drawing one of the images in the pack. Well, we decided to do something a bit different and create a collection of .WEBM (*and .gif*) files that convey the same thing.

This would achieved by stitching together anywhere from 5 to ~17 work-in-progress shots and can be both neat and informative to aspiring artists or the curious – especially in tandem with the .PSD file!

All you have to do is export the canvas as an image more than 5 times throughout the drawing process. Send them to Fishy-Pony and he'll turn them into a GIF/WEBM akin to the thumbnailed ones seen above.

Image Guidelines

- No anthro please! A humanoid figure amongst a bunch of pony-folk would stick out like the Lakers at a petting zoo
- Futa is fine as long as it's an edit of female pony!
- The images must be high resolution
 - **2800 x 2800** is a good starting point

- The picture must be polished
- All images/edits must be exported in .PNG quality via Dropbox or the likes
 - Imgur does not work as they love to compress images
 - Skype might compress the files. Zip them before sending
 - Don't worry about filenames, we'll tweak them in the end for you
- NSFW art only! Teasy skin-tight edits are fine, but the base image must be NSFW
 - It can range from a pin-up to full on penetration
- M/F or F/F is also a general crowd pleaser and allowed, but it's not expected or anything!
- No focusing on an OC in a canon-centered picture
 - Cameos are fine as long as it isn't overly distracting
- **No foals!**
 - Foalcon isn't for everyone and can be a huge deal breaker for some
 - *Aged up* is a-okay though
- **No humans!**
 - Ditto

A Few Months Later

After a few more months all stragglers will have probably purchased the pack. At this point the E-Junkie listing will be put to rest and a final dividend will be paid to each artist. (*Same even split as before!*) Further information can be found under the *Info on the Art Pack* tab.
