Forewurd

Old Ponish captures a magical time in our history. It represents a formal literal unity of the Three Tribes. While its use as a lingua franca had been developing for generations, it was not given academic merit until the uniting of the tribes brought about a need for a single unifying language.

"Decrees need to be proclaimed! Laws need to be written! Yet each tribe speaks its own tongue!"

However, much to Princess Platinum's embarrassment, the very language she was speaking to her fellow leaders held the answer. For while she thought she was speaking the language of the Earth ponies, she was actually speaking a simpler form of Ponish that was used in trades and negotiations: the same language spoken by merchants, farmers, sailors and adventurers. And even for those without any knowledge of the Ponish language, the creole was simple enough to pick up and its use was encouraged by the ponies reaching out to foreigners with it.

Old Ponish, while its roots are found in the Earth pony language, finds its wings with Pegasan. The warrior race traded (and scuffled) with distant lands. They told stories of bravery and conquest filled with heroes and virtues. They told anyone who would listen about the edges of the world and the boundless sky above. They met the Kirin of the Far East and crossed the Saddle Arabian deserts.

Yet it was the Unicorns who whet the pony world's appetite by sharing their arts, science and magic. The Pegasi would not have been the legends they were without the armor forged by Unicorn smiths: as quickly as the unicorns could develop theory, the pegasi would apply it. And both needed the raw materials from the earth in order to do so. And so come the earth ponies into the picture.

Masters of the earth, they created food and mineral from seemingly their dirt and sweat. They were the center of most trades because no other tribe could produce such an abundance of food or resources. And so naturally, the unicorns and pegasi were quick to learn enough of the Earth pony language to befriend and negotiate. This "broken" Ponish wasn't perfect to any ears, but neither were their relations.

Yet despite long winters, mass migration and the near total collapse of civilization, their bonds and the language representing it remained: this tongue of none became a language to unite them all. This creole language, known nowadays as Old Ponish, represents the friendships formed between ponies so different working together for a common goal.

Dictionaries like this one were drafted in the early years of the unification to honor the language. This one presents what was the closest to a common form with spelling based on popular writers of the vernacular. Variants and dialects were common, but the goal above all was communication with all of Equestria.

This table of runes will always be right -- refer back to this if there are any contradictions on other pages.
(Said contradictions likely arose from the fact that Old Ponish Runes is not a font.)
