

In A Tizzy_Demo V1 Lyrics

[Verse 1]

Wild, style, funky fresh
Creating new inventions is what I do best
Imagination with a dash of charm
Go all the way, there's no false alarm

A creative genius, haven't you heard?
Creation, that's my favourite word
Find a way to make something great
With whatever's around, time to create

[Pre Chorus]

Putting stuff together, making something brand new
Stoke the flame and light the fire
There's no limit to what my imagination can do
My brain is working overtime

[Chorus]

My my new creation
Is a new sensation
My my new creation
Let's go, time to create!

My my new creation
Is a new sensation
My my new creation
Let's go, time to create!

[Verse 2]

Weird and wacky things, are what I like best
So give 'em here and I'll do the rest

Quick turning out a brand new design
A cool new wonder in no time

A little bit of magic is all I need
And I'll use my creativity
Transformation is what I bring
So just sit back, and I'll do my thing

[Pre Chorus]

Putting stuff together, making something brand new
Stoke the flame and light the fire
There's no limit to what my imagination can do
My brain is working overtime

[Chorus]

My my new creation
Is a new sensation
My my new creation
Let's go, time to create!

My my new creation
Is a new sensation
My my new creation
Let's go, time to create!
