Diagnostics — More information about the performance of your application.

● Keep request counts low and transfer sizes small — 8 requests • 231 KB

**Passed audits (21)**

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Additional items to manually check (11) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

Best Practices

Passed audits (15)

SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. [Learn more](#).

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

Fast and reliable

- Page load is fast enough on mobile networks 
- Current page responds with a 200 when offline 
- start_url responds with a 200 when offline 

Installable

- Uses HTTPS 
- Registers a service worker that controls page and start_url 
- Web app manifest meets the installability requirements 

PWA Optimized

- Redirects HTTP traffic to HTTPS 
- Configured for a custom splash screen 
- Sets an address-bar theme color 

- Content is sized correctly for the viewport
- Has a `<meta name="viewport">` tag with width or initial-scale
- Contains some content when JavaScript is not available
- Provides a valid apple-touch-icon

Additional items to manually check (3) — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
